The objectives are:

- Provide a free, two day event for 200 delegates with the opportunity to participate in workshops, seminars, presentations and plenary sessions on a range of relevant topics.

- Ensure that the conference is specifically applicable and relevant to those responsible for implementing the HIV Action Plan within the NHS and Local Authorities
- Engage participants in discussions on the latest international research evidence and lessons learned, encouraging them to address the challenges of applying these to the needs of gay and bisexual men in Scotland.
- Provide a forum to share promising and innovative practice and to learn from what has and what has not succeeded in Scotland and internationally.
- Identify key priorities for action in sexual health promotion and develop a clear focus for future sexual health work for gay and bisexual men in Scotland

HIV Comeback Tour

Gay Men's Health in partnership with other voluntary organisations and NHS Lothian have launched a new phase of the award winning HIV prevention campaign in Edinburgh. The campaign features images of men in bars and saunas and highlights the fact that condoms are still our best protection against HIV transmission.

The **campaign** also reminds us of some of the facts about HIV e.g. that every week in Lothian a gay or bisexual man is diagnosed with HIV.

In a survey recently published by the Medical Research Council, almost a third of gay and bisexual men with HIV did not know they were infected. The campaign stresses that the only way to know if you have HIV is to have a test. For more [information on HIV testing click here](#).
